WHY DYNAMIC DOORS?

Sean Doyle Windows composite doors are one of Ireland's leading brands of residential doors, manufactured and assembled using only the best of components, you can rest assured these hand built doors are amongst the best available.

Exceptional Durability

High impact resistant glass reinforced polyester (GRP) skin that will maintain its pristine appearance.

Stunning Aesthetics

The woodgrain finish was developed from oak tree grain. You'll also find the same woodgrain effect and moulding design on the slim glazing cassette, giving a seamless and authentic finish.

Low Maintenance

Everything about our GRP composite door is designed to be easy to maintain - simply wipe clean with warm soapy water.

Read about door maintenance on page 51.

Excellent Weatherproofing

With water resistant polymer composite rails, our doors will keep the weather at bay and will stay looking great for longer.

Unparalleled Security

Our GRP composite doors offer enhanced security thanks to its rigid polymer sub-frame, high density insulated core and high impact resistant GRP skin. Rest assured that our doors are tried, tested and trusted, keeping you and your family safe.

Triple Glazed Glass

Our triple glazed, laminated as standard insulated glass units encapsulate the decorative glazing between two panes of clear glass, protecting it and making it easy to keep clean.

Superb Sound Insulation

With a weighted noise reduction of 31 decibels it means you can be sure your new door will keep outside noise to a minimum.

LOOK FOR THE INDICATIVE
RATING ON EACH PAGE

When it comes to thermally efficient doors, a dynamic GRP composite door is the best choice you can make.

These days, we all worry about how much energy our homes use. The rising cost of our energy bills and our impact on the environment mean we want to keep our consumption to a minimum.

One of the best ways to do this is to choose thermally efficient products that keep warmth in and cold out, saving money and emissions.

The alphabetical, colour coded scales shown in this brochure follow the same grading system as that found in white goods with 'A' representing the most energy efficient. The testing shows the thermal efficiency of each of the doors. The darker the blue, the less heat is being lost. Reds and greens – the predominant colours on the timber door – indicate high heat loss.

A front door is a focal point of most properties and the hardware should reflect this. The Unicorn Letter plate has been designed very much with aesthetics in mind with its simple but elegant styling, designed to complement any door and suited finishes with other Trojan door furniture. The construction is unique with pressed metal flaps that shroud the surround from view.
